PROFESSIONAL SUMMARY

Motivated and enthusiastic AI/ML learner currently enrolled in the Deep Learning program at SMIT (Saylani Mass IT Training Program), Hyderabad. Hands-on experience in building Machine Learning and Deep Learning projects using Python, including classification models, data analysis, neural networks, and Exploratory Data Analysis (EDA) on real-world datasets. Proficient in Python, NumPy, Pandas, scikit-learn, and basic neural network implementation. Eager to apply my skills in a real-world environment and gain practical industry experience in model training and deployment. Available immediately for a full-time on-site AI/ML Engineer or AI/ML Intern position in Hyderabad.

TECHNICAL SKILLS

Programming Languages: Python (Proficient)

Data Science & Analysis: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Data Visualization

Machine Learning: Scikit-learn, Classification Models, Feature Engineering, Model Training & Evaluation

Deep Learning: Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN)

Other Tools: Web Scraping, Git & GitHub, Problem Solving, Fast Learning

---

PROJECTS

Heart Disease Prediction Using Machine Learning

- Developed a machine learning classification model to predict heart disease risk from patient data

- Performed data preprocessing, feature engineering, and trained multiple algorithms with scikit-learn
- GitHub: https://github.com/Ammar2380/Heart-Disease-Prediction-Using-Machine-Learning

Pakistan Real Estate Data Analysis

- Conducted comprehensive Exploratory Data Analysis (EDA) on a local Pakistani real estate dataset
- Generated visualizations and extracted actionable market insights relevant to Pakistan
- GitHub: https://github.com/Ammar2380/pakistan-real-estate-data-analysis

Deep Learning Assignments

- Implemented basic Artificial Neural Network (ANN) and Convolutional Neural Network (CNN) models
- Gained practical understanding of neural network architecture and training
- GitHub: https://github.com/Ammar2380/deep-learning-assigments

E-commerce Order System

- Built a Python-based system for managing orders and basic inventory operations
- GitHub: https://github.com/Ammar2380/ecommerce-order-system

Supermarket Sales Data Analysis

- Explored and analyzed supermarket transaction data to uncover sales patterns and business insights
- LinkedIn Post: https://www.linkedin.com/posts/muhammad-ammar-jamali-4557b2366_first-data-science-project-explored-a-supermarket-activity-7428344810270400512-HB0E

Web Scraping Project

- Developed a Python web scraper to collect real-world data from websites
- LinkedIn Post: https://www.linkedin.com/posts/muhammad-ammar-jamali-4557b2366_datascience-python-webscraping-activity-7432076048520900609-M3-j

NumPy Assignment

- Completed advanced NumPy exercises demonstrating strong numerical computing and array manipulation skills
- GitHub: https://github.com/Ammar2380/Numpy-Assignment-1

EDUCATION

Deep Learning Course (Currently Enrolled)
SMIT – Saylani Mass IT Training Program, Hyderabad, Sindh

Bachelor of Science in Data Science
Sindh University | In Progress

ADDITIONAL INFORMATION

- **Location:** Hyderabad, Sindh – Fully available for immediate full-time on-site work
- Strong problem-solving skills and quick learner
- Highly motivated to work on real AI/ML projects and grow professionally
- Open to AI/ML Engineer or AI/ML Internship opportunities
